TASER ENERGY DEVICES WITH AXON EVIDENCE

SIMPLIFY EVIDENCE HANDLING AND STRENGTHEN OVERSIGHT

By prioritizing transparency and accountability, law enforcement agencies not only enhance community trust but also gain significant operational benefits with Axon's TASER energy devices when used with Axon Evidence. TASER energy devices capture detailed event and pulse logs, crucial for transparent records and supporting officers' testimonies, thus potentially reducing legal expenses associated with use of force incidents. Axon Evidence streamlines device management, automatic evidence uploads and firmware updates, alongside easy inventory tracking and unmatched cost efficiency.

ENHANCED TRANSPARENCY FOR EVERY INCIDENT

TASER energy devices automatically log the following information whenever an officer uses the device in the field. This provides agencies with accurate incident records and policy compliance monitoring:

DETAILED SHOW AND USE OF FORCE INSIGHTS

- Unholstered and Holstered¹
- Armed and Disarmed
- Weapon Raised and Lowered¹
- Warning Alert/Arc
- Trigger Pulled
- Cartridges Deployed
- Cartridge Flight Distance¹
- Energy Discharged
- Percentage of Discharge Duration (where energy was actually sent into a connection)^{1,2}
- Connection Resistance¹ (e.g. material type)

“ I was called to be an expert witness for a case where a violent, drug-intoxicated subject was subdued with a **TASER X2**. The subject filed an intent to sue for excessive use of force. While in court the TASER X2's firing logs were presented as evidence, corroborating the deputies' accounts and helping **prevent a lawsuit from developing.**”

Kevin Sailor
WESTMINSTER PD³

¹ Data only available with the TASER X2, not previous models.

² Measured resistance tells us if a connection is usable by the weapon (e.g. within its operational range) and what type of material the electrical current is pulsing through. As a general reference, the following ranges were identified during a scientific study: < 300 ohms is not human tissue; 400 to 800 ohms can be human muscle; > 900 ohms is skin, fat, or not human tissue (Dawes et al., 2010). Reference: Dawes D, Ho J, Krohn M, Merner J. 2010. Electrical Characteristics of an Electronic Control Device Under a Physiologic Load: A Brief Report. PACE, 33(3): 330-336.

³ How Safe Are TASER Weapons?

A NEW ERA IN LESS-LETHAL TECHNOLOGY

Through extensive research and customer feedback, Axon has developed our most capable and sophisticated TASER energy weapon to date. TASER 10 has a maximum range of 45 feet and 10 probes, featuring individually targeted probes and any-probe connect. These new capabilities significantly increase accuracy and effectiveness, decreasing the likelihood of escalation to lethal force.

FEATURES AND BENEFITS

/ 45-FOOT MAXIMUM RANGE

At nearly double the range of previous TASER energy weapons, TASER 10 creates more time and space to de-escalate and resolve conflicts.

/ 10 SINGLE-PROBE CARTRIDGES

10 single-probe cartridges provide users with up to 9 opportunities to achieve an effective connection and induce neuromuscular incapacitation (NMI).

/ INDIVIDUALLY TARGETED PROBES

Intuitive single probe deployment allows users to place each probe with precision and accuracy regardless of distance to the subject. Users can also create their own spread up close and at a long range, choosing their preferred target area.

/ ANY-PROBE CONNECT

Users no longer need to concern themselves with probe polarity. Any two deployed probes can create a successful connection. If there are multiple (more than two) probe connections, TASER 10 automatically selects and energizes only the top four connections, safely optimizing neuromuscular incapacitation, regardless of the total number of probes deployed.

/ VR INTEGRATION

Integration with Axon VR allows officers to enhance TASER proficiency, use-of-force decision-making, confidence and accuracy under stress.

/ AUDIBLE AND VISUAL WARNING ALERT

A bright pulsing light and loud alert sound emit whenever the weapon's Warning Alert is initiated, allowing the user the opportunity to de-escalate without deploying cartridges.

By upgrading to the TASER 10, your department is advancing generations beyond your current TASER X26P technology, implementing an all-inclusive certification program and introducing VR to your training program. These advancement significantly boosts operational effectiveness and success, officer safety, reliability and TASER program management, all contributing to long-term value for Bryant PD and the city as a whole.

Below, I shared the key reasons why investing in TASER 10 will ultimately benefit Bryant PD and how the TASER 10's improvements directly tackle the limitations that sometimes kept older devices from being used to their full potential (such as limited range or past reliability issues):

- **Extended Range:** TASER 10 provides an effective range of up to 45 feet, nearly doubling the 25-foot range of the X26P, allowing officers to engage subjects from a safer distance and in more circumstances and situations, significantly reducing risks while increasing usage.
- **Multi-Shot Capability:** The TASER 10 can deploy up to 10 individual probe cartridges without reloading, whereas the X26P was a single-deployment device. This significantly enhances both accuracy and chances of a successful deployment.
- **Improved Probe Design:** TASER 10's probes fly faster (205 FPS vs. 180 FPS with the X26P) and uses a wire with a non-conductive coating that spools out from the probe itself rather than directly from the TASER handle. This reduces the amount of bounce-offs and disconnects and aids with post-deployment management.
- **Adaptive Cross-Connect Technology:** The TASER 10 can intelligently manage multiple probes that hit a target. It automatically selects the best two (or even three or four) probe connections out of the probes that have hit, and dynamically adjusts the electrical pulse between them up to 44 times per second to achieve effective incapacitation vs 19 pulses per second with X26P.
- **Enhanced Lighting and Warning Features:** TASER 10 comes with a built-in 210 lumen flashlight (with a 1000 lumen strobe capability in warning mode) to improve low-light use and deescalate, whereas X26Ps do not have integrated lights. It also has a new Warning Alert function – a loud, pulsating alert tone and flashing light that can be activated as a deterrent without firing.

Additionally, it's essential to recognize that TASER use isn't just about physical deployment. Each time an officer simply displays the TASER, activates its laser, or demonstrates a warning alert, it often leads directly to de-escalation. These "non-contact" uses significantly reduce incidents of physical force, injuries, and related liabilities and are important to consider as part of the uses of the TASER.

In summary, transitioning to the T10 program offers clear and compelling advantages over your existing X26P platform:

- **Comprehensive Solution:** T10 effectively addresses and resolves any limitations present in the X26P, ensuring optimal performance and reliability.
- **Superior Versatility:** With increased situational application capabilities, the T10 can adapt seamlessly to diverse scenarios beyond the scope of the X26P, significantly enhancing operational flexibility.
