b. Inspections:

Completed inspection forms will be kept with the SWPPP.

ADEQ's inspection form will be used (See Appendix B)

or

☐ A form other than ADEQ's inspection form will be used and is attached (See inspection form requirements Part II.A.4.L.2)

- c. Inspection records will be retained as part of the SWPPP for at least 3 years from the date of termination.
- d. It is understood that the following sections describe waivers of site inspection requirements. All applicable documentation requirements will be followed in accordance with the referenced sections.

  - ii. Adverse Weather Conditions (Part II.A.4.L.5)

#### J. Maintenance:

The following procedures to maintain vegetation, erosion and sediment control measures and other protective measures in good, effective operating condition will be followed: The site erosion control measures will be checked periodically by site personnel and by the inspector during his visits. Any measures deemed deficient will be identified and appropriate repairs will be initiated.

Any necessary repairs will be completed, when practicable, before the next storm event, but not to exceed a period of 3 business days of discovery, or as otherwise directed by state or local officials.

#### K. Employee Training:

The following is a description of the training plan for personnel (including contractors and subcontractors) on this project: All job foremen and inspectors will be taught how to recognize deficiencies and failures in the erosion control structures. They will be taught how to maintain any erosion control measures in place on the site, and will be instructed in how to lead workmen in maintaining and repairing said structures. They will be instructed to immediately contact job supervisors for consultation if there are any problems with the erosion control measures.

\*\*Note, Formal training classes given by Universities or other third-party organizations are not required, but recommended for qualified trainers; the permittee is responsible for the content of the training being adequate for personnel to implement the requirements of the permit.

Mr. Truett Smith, Director Community Development 210 S.W. 3<sup>rd</sup> Street Bryant, AR 72022

RE: Site Plan – Reynolds Centre Commercial Expansion, Bryant, Arkansas

Dear Mr. Smith:

We have attached 12 copies of the site plan and proposed elevations for the new building in the Reynolds Centre development. We have also attached 2 full sets of civil design plans and the storm water pollution prevention plan. As you know this is the last building of a larger development. Our client plans to use much of the existing site as is and disturb as little as necessary.

The landscape area for this building is relatively small and confined to parking islands and the southern border of the proposed building in this undeveloped section.

Most utilities already existing for the proposed area, but a sewer extension is planned to the existing sewer line on the West side of the property. The site is graded for surface stormwater flow. Since all site conditions are existing there is no additional detention planned.

Please feel free to call me if you have any questions.

Sincerely,

Tommy Bond P.E

# ADA/ABA ACCESSIBILITY STANDARDS

The Americans with Disability Act and Architectural Barriers Act Accessibility Guidelines were prepared by the U.S. Access Board and mandated by the U.S. Department of Justice regulations implementing Title III as the official ADA/ABA accessibility guidelines. All new construction, remodeling, and modifications must conform to these building standards for places of public accommodation and commercial facilities. Residential is exempt.

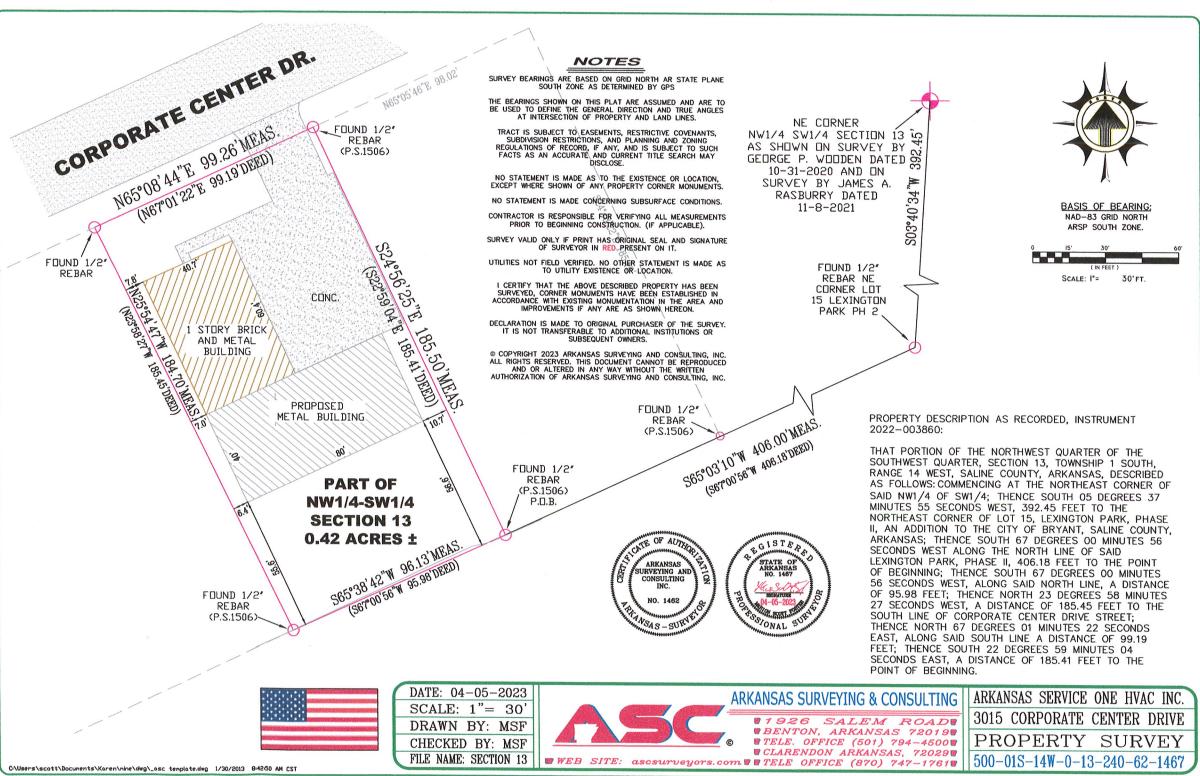

The ADA/ABA accessibility guidelines contain general design standards for building and site elements, such as accessible entrances and routes, ramps, parking spaces, stairs, elevators, restrooms, signage, etc. Also included are specific standards for restaurants, medical care facilities, libraries and transportation facilities and vehicles, and places of lodging.

The guidelines also include "scoping" requirements that outline the necessary features or appropriate quantity for achieving ready access. For example, at least 50 percent of all public entrances to buildings must be accessible with an accessible path of travel. In public restrooms, at least one bathroom stall must be accessible unless there are more than six stalls, in which case the number increases.

I hereby certify that I have read and examined the above notice and will comply with all guidelines of the ADA Accessibility Guidelines. I further understand that a copy of the ADA/ABA Regulations are available for inspection during business hours of City Hall or I may obtain a copy by writing:

The annual assessments, together with interest, costs and reasonable attorneys' fees, shall be a charge on the land and shall be a continuing lien upon the property against which each such assessment is made. Each such assessment, together with interest, costs, and reasonable attorneys' fees, shall also be the personal obligation of the person who is the owner of such property at the time when the assessment fell due. The personal obligation for delinquent assessments shall not pass to his successors in title unless expressly assumed by them.

SECTION 2: Purpose of Assessment: The assessments levied by the Association shall be used as follows:

- (a) For the maintenance and upkeep of all common areas including detention ponds and other drainage structures that serve the entire subdivision even if located in a different phase of the subdivision.
- (b) For any other purposes deemed in the best interest of the property owners by the Association

SECTION 3: Annual Assessment: The initial conveyance from Developer to owner shall have a set annual assessment due by the new owner of \$10.00, if said property is a vacant lot and a pro-rate value of \$60.00 if said lot has a residence. From and after January 1 of the year immediately following the conveyance of the Lot from the Developer to an Owner, annual assessments shall be \$60.00 per lot regardless if land is vacant or has a residence and also provided that ownership of a lot on which a residence is located and an adjacent lot shall be considered one lot for fee purposes.

- a. From and after Jamary 1 of the year immediately following the conveyance of the Lot to an Owner, the maximum annual assessment may be increased each year not more than 5% above the maximum assessment for the previous years with a vote of over 50% of the membership.
- (b) From and after January 1 of the year immediately following the conveyance of the Lot to an Owner, the maximum annual assessment may be increased above 5% by a vote of two-thirds (2/3) of each class of members who are voting the person or by proxy, at a meeting duly called for this purpose.
- (c) The Board of Directors may fix the annual assessment at an amount not in excess of the maximum.

SECTION 4: Notice and Quorum for Any Action Authorized Under Section 3: Written Notice of any meeting called for the purpose of taking any action authorized under Section 3 shall be sent to all members not less than 10 days in advance of the meeting. At the first such meeting called, the presence of member or proxies entitled to cast 60% of all votes shall constitute a quorum. If the required quorum is not present, another meeting may be called subject to the same notice requirement, and the required quorum at the preceding meeting shall be one-half (1/2) of the required quorum at the preceding meeting. No such subsequent meeting shall be held more than 60 days following the preceding meeting. Each tract as conveyed by Declarant shall have one vote.

SECTION 5: Uniform Rate of Assessment: Both annual and special assessments must be fixed at a uniform rate and may be collect on a semi-annual or annual basis.

SECTION 6: Date of Commencement of Annual Assessments: Due Dates: The annual assessments provided for herein shall commence as to all Lots on the first day of January

Written notice of the annual assessment shall be sent to every Owner subject thereto. The due date shall be established by the Board of Directors. The Association shall, upon demand, and for a reasonable charge, furnish a certificate signed by an officer of the Association setting forth whether the assessments on a specified Lot have been paid. A properly executed certificate of the Association as to the status of assessments on a Lot is binding upon the Association as of the date of its issuance.

SECTION 7: Effect of Nonpayment of Assessments: Remedies of the Association: Any assessment not paid within thirty (30) days after the due date shall bear interest from the due date at the rate of ten percent per assum. The Association may bring an action at law against the owner personally obligated to pay the same, or fixeclose the lien against the property. No owner may waive or otherwise escape liability for the assessments provided for herein by non-use of the common area or abandonment of the property.

SECTION 8: Subordination of the Lien to Mortgages: The lien of the assessments provided for herein shall be subordinate to the lien of any first mortgage. Sale or transfer of any tract shall not affect the assessment lien. However, the sale or transfer of any tract pursuant to mortgage foreclosure or any proceeding in lieu thereof, shall extinguish the lien of such assessments as to payments which became due prior to such sale or transfer. No sale or transfer shall relieve such tract from liability for any assessments thereafter becoming due or from the lien thereon.

SECTION 9: Special Assessments for Capital Improvements: In addition to the annual assessments authorized above, the members may levy, in any assessment year, a special assessment applicable to that year only for the purpose of defraying, in whole or in part, the cost of any construction, reconstruction, repair or replacement of a capital improvement upon the common areas, provided that such assessment shall have the assent of two-thirds (2/3) of the votes of the members who are voting in person or by proxy at a meeting duty called for this purpose.

Cidilatice No. 2000-30	Ordinance	No.	2006-	38	
------------------------	-----------	-----	-------	----	--

AN ORDINANCE TO LIMIT THE SALE AND DISCHARGE OF FIREWORKS WITHIN THE CITY OF BRYANT, AND FOR OTHER PURPOSES.

WHEREAS, it is the desire of the City of Bryant to maintain the safety and peace of the city.

NOW, THEREFORE, BE IT ORDAINED by the City Council of the City of Bryant, Arkansas, that:

Section 1: The term "fireworks" means and includes any combustible or explosive composition or any substance, combination of substances, or article prepared for the purpose of producing a visible or audible effect by combustion, explosion deflagration, or detonation and includes, but is not limited to, sky rockets, roman candles, daygo bombs, blank cartridges, toy cannons, toy canes, or toy guns in which explosives other than toy paper caps are used, the type of balloons which require fire underneath to propel then, firecrackers, torpedoes, sparklers, or other fireworks of like construction, any fireworks containing any explosive or flammable compound, or any tablet or other device containing any explosive substance. This definition includes items which contain even small amounts of silver fulminate, potassium nitrate, ammonium perchlorate, or other chemical or pyrotechnical composition intended to produce a pyrotechnic event or effect, even if not classified as a "hazardous material" under federal regulation.

### Section 2: Regulations

- A. No individual, firm, partnership, corporation, or association shall possess for sale, sell, or offer for sale at retail, or discharge within the city limits, any fireworks, as defined herein, except as specifically provided in this chapter.
- B. No parent, guardian, or custodian of any child under the age of majority shall knowingly permit or consent to the possession or discharge of fireworks by any child under the age of majority without proper supervision. Possession or discharge by any child under the age of majority within the city limits shall be *prima facie* evidence of the knowing permission or consent of such parent, guardian, or custodian.
- C. No fireworks may be discharged within the boundaries of or within three hundred (300) feet of any public park owned or maintained by the City without a public display permit except as otherwise provided in this chapter. No fireworks may be discharged upon any public street, alley, road, or right-of-way, except as otherwise provided in this chapter. No fireworks may be discharged within 1000 feet of any

hospital, nursing, or assisted living facility. No fireworks may be discharged under or upon a motor vehicle, whether moving or not, or within 300 feet of any gas station; gas, oil, or propane storage facility; or other area which is highly flammable by nature.

As used in this part, "safe and sane manner" refers to actions which do not endanger life, limb or property of those in the area of the discharge. Any discharge, with or without a permit, is at the individual, firm, partnership, corporation or association's own risk, and is not sanctioned by this ordinance.

- E. - F. Any individual, firm, partnership, corporation, or association discharging fireworks under this ordinance shall, upon such discharge, be responsible for clean-up of the discharge site, including disposal of all discharged fireworks, all non-discharged or "dud" fireworks, and the associated debris from the discharged fireworks in a safe manner.

### I. Inspections

a. Inspection free	quency:
--------------------	---------

Every 7	calendar	days
---------	----------	------

or

At least once every 14 calendar days and within 24 hours of the end of a storm even 0.25 inches or greater (a rain gauge must be maintained on-site)

b. Inspections:

Completed inspection forms will be kept with the SWPPP.

ADEQ's inspection form will be used (See Appendix B)

or

☐ A form other than ADEQ's inspection form will be used and is attached (See inspection form requirements Part II.A.4.L.2)

- c. Inspection records will be retained as part of the SWPPP for at least 3 years from the date of termination.
- d. It is understood that the following sections describe waivers of site inspection requirements. All applicable documentation requirements will be followed in accordance with the referenced sections.
  - i. Winter Conditions (Part II.A.4.L.4)
  - ii. Adverse Weather Conditions (Part II.A.4.L.5)

### J. Maintenance:

The following procedures to maintain vegetation, erosion and sediment control measures and other protective measures in good, effective operating condition will be followed: The site erosion control measures will be checked periodically by site personnel and by the inspector during his visits. Any measures deemed deficient will be identified and appropriate repairs will be initiated.

Any necessary repairs will be completed, when practicable, before the next storm event, but not to exceed a period of 3 business days of discovery, or as otherwise directed by state or local officials.

### K. Employee Training:

The following is a description of the training plan for personnel (including contractors and subcontractors) on this project: All job foremen and inspectors will be taught how to recognize deficiencies and failures in the erosion control structures. They will be taught how to maintain any erosion control measures in place on the site, and will be instructed in how to lead workmen in maintaining and repairing said structures. They will be instructed to immediately contact job supervisors for consultation if there are any problems with the erosion control measures.

\*\*Note, Formal training classes given by Universities or other third-party organizations are not required, but recommended for qualified trainers; the permittee is responsible for the content of the training being adequate for personnel to implement the requirements of the permit.

Mr. Truett Smith, Director Community Development 210 S.W. 3<sup>rd</sup> Street Bryant, AR 72022

RE: Site Plan – Reynolds Centre Commercial Expansion, Bryant, Arkansas

Dear Mr. Smith:

We have attached 12 copies of the site plan and proposed elevations for the new building in the Reynolds Centre development. We have also attached 2 full sets of civil design plans and the storm water pollution prevention plan. As you know this is the last building of a larger development. Our client plans to use much of the existing site as is and disturb as little as necessary.

The landscape area for this building is relatively small and confined to parking islands and the southern border of the proposed building in this undeveloped section.

Most utilities already existing for the proposed area, but a sewer extension is planned to the existing sewer line on the West side of the property. The site is graded for surface stormwater flow. Since all site conditions are existing there is no additional detention planned.

Please feel free to call me if you have any questions.

Sincerely,

Tommy Bond P.E

## ADA/ABA ACCESSIBILITY STANDARDS

The Americans with Disability Act and Architectural Barriers Act Accessibility Guidelines were prepared by the U.S. Access Board and mandated by the U.S. Department of Justice regulations implementing Title III as the official ADA/ABA accessibility guidelines. All new construction, remodeling, and modifications must conform to these building standards for places of public accommodation and commercial facilities. Residential is exempt.

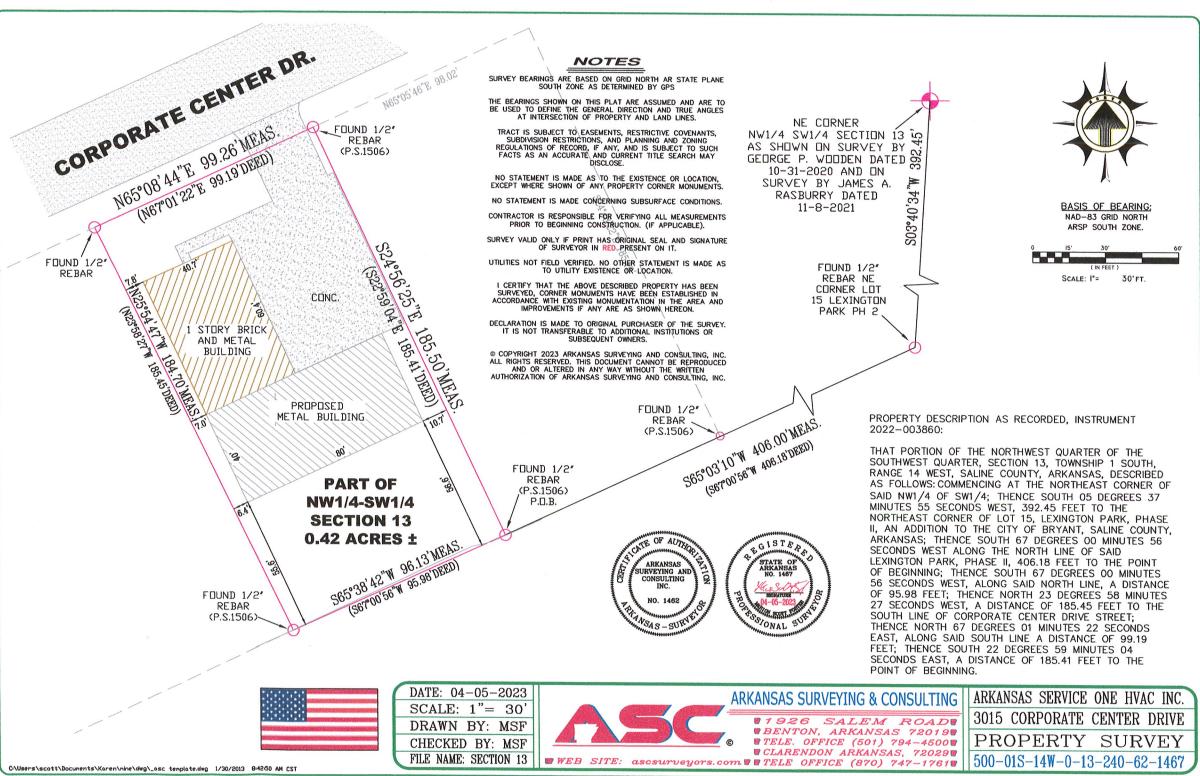

The ADA/ABA accessibility guidelines contain general design standards for building and site elements, such as accessible entrances and routes, ramps, parking spaces, stairs, elevators, restrooms, signage, etc. Also included are specific standards for restaurants, medical care facilities, libraries and transportation facilities and vehicles, and places of lodging.

The guidelines also include "scoping" requirements that outline the necessary features or appropriate quantity for achieving ready access. For example, at least 50 percent of all public entrances to buildings must be accessible with an accessible path of travel. In public restrooms, at least one bathroom stall must be accessible unless there are more than six stalls, in which case the number increases.

I hereby certify that I have read and examined the above notice and will comply with all guidelines of the ADA Accessibility Guidelines. I further understand that a copy of the ADA/ABA Regulations are available for inspection during business hours of City Hall or I may obtain a copy by writing:
